

Handicare Freecurve

Our smoothest curved stairlift

The Freecurve is our smoothest curved stairlift, designed to provide a seamless and comfortable ride.

Handicare Freecurve | Our smoothest curved stairlift

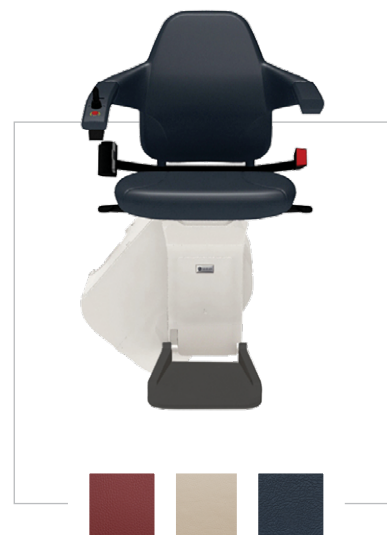

We know how important it is for your stairlift to blend into your home décor. That's why we offer you the chance to choose from three styles of seats, with different varieties of upholstery and three standard rail colours.

Features

Energy efficient

Low running costs and batteries that remain operational if there's a power cut.

Compact

Leaves plenty of space on the stairs to walk up and down safely.

Safety

Interlocking seatbelt - the stairlift will not move until the seatbelt is fastened. Other optional features include an emergency stop button and safety sensors.

Easy to use

Scan the QR-code to watch our video showing how to use the Freecurve.

Single rail design

The Freecurve is a single tubular rail design which is custom-made to fit your staircase. With its slim, stylish design, it offers a smooth and comfortable ride.

Unobtrusive on your stairs, the Freecurve has the most wide-ranging appeal for homes and stairs that turn corners or bends.

Powered options

Depending on your needs, the Freecurve comes with many optional extras such as the powered seat swivel and powered folding footrest, and the Active Seat to help you get in and out of the seat more easily.

If you have particularly narrow stairs, we have the two-way powered swivel which means the stairlift travels up and down at an angle to avoid your knees clashing on the wall.

Augmented reality

See how your stairlift will look on your staircase with our advanced digital staircase measurement system - PhotoSurvey4D. Ensuring 100% accurate dimensions of your stairs, hallway and landing, our approved partners can generate measurements in as little as 10 minutes!

Optional extras

Easily upgrade with tailored options to suit your needs today and tomorrow. Choose from an illuminated footrest, remote controls, a choice of seatbelts, extra battery capacity for longer lifts, child seats and an automatic hinged rail with a safety system to avoid obstruction at the bottom of the stairs.
